

How to play Square Up!

Before you start!

1. Lift the clear cover to its upright position, as illustrated below.
2. Each player takes 24 tiles, which must be 4 of each colour.
3. At random, each player places all of their tiles into the base tray, so there is just one empty space left over.
4. Both players take a cube shaker.

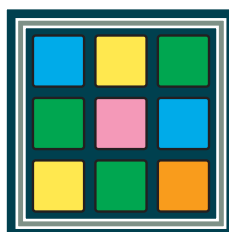

Object of the game:

To be the first to slide your tiles into exactly the same pattern in the centre as shown by the 9 colours in your cube shaker.

Instructions for play

1. Each player shakes their cube shaker at the same time until all the cubes are sitting properly in their slots.
Note: there must not be more than 4 cubes of the same colour facing you. If that happens, shake again.
2. The cube shaker must be put down next to the player and not touched again until the start of the next game.
3. Each player must SLIDE their tiles around their tray and try to get the 9 centre tiles to exactly match the arrangement of the colours in their cube shaker. Tiles **must not** be lifted out of the base tray at any time during play.
4. The first player to successfully match the colour pattern in their cube shaker must close their lid so that the centre 9 tiles are framed. That player has won the game.
5. To play another round, simply shake the cubes again to get a new puzzle pattern. The tiles do not need to be reshuffled!

To win the game, the 9 centre tiles visible in the tray with the lid closed **MUST** match the pattern of colours in the cube shaker.
